

003 Earth Changes-20 year Projection

Dr. Carlos Blair

And I say good evening to you all. It is indeed a pleasure for me to once again have the opportunity to manifest in this manner. And I am Dr. Carlos Blair and, well, lest you not recognize it, I'm a little bit English and I did that pretty well, did I not David? Considering I have these new fangled things here to work with and so forth, I thought I did it quite well. Well it is going to take some getting used to I guess, kind of like a wife. But they're all right.

This evening I've chosen to speak on the subject which I have considered and contemplated upon for quite some time. But I'd like to clarify prior to embarking upon the subject that it is not for the purpose of creating any fear what-so-ever in any one, but rather to create a greater awareness of understanding. And I would like to speak as most of you know, a couple of weeks ago I spoke on the prophecies as it were, for the coming year, here in your earth plane. Now I'd like to speak this evening on the subject that I would address as being the earth changes that are in the offing. Because there are many, and many of the earth changes which are taking place, have been taking place for quite some time. And to start properly I would prefer to go back into previous patterns of change that the earth as it were has undergone in the past.

Many of the scientists of your day look and refer to five different times that there have been major earth changes as it were. The one of course which most of you have great awareness of is that of the Atlantis. There have been however others who have professed that they have proof as it were, that there have been somewhere upwards ten major earth changes since the beginning of time.

We in spirit find that there have indeed been five and there is about to be another major earth change which will take place. It will be contrary to the popular belief, however, wherein most individuals in the physical body envision, as it were, the state as you know it as California will fall off into the ocean in it's entirety and there'll be total destruction everywhere.

I would like to speak first of all about some areas around your immediate country because after all that's where your greatest interest lies. That will have drastic effects and where they in fact will originate, contrary to what has been spoken of previously by most, the beginning of the major earth changes that'll be seen will not be on the west coast of what you know of as the continental United States, but rather on the east coast. And will begin with the state of Florida. Now most of you or many may have awareness of what science has referred to as the Bimini wall. It is a wall which at this time is underwater off of the southeastern coast of Florida. That wall science has been watching it very closely, especially since 1977. And it has gradually been rising. The rising of that wall is in direct conjunction with a fault in the Caribbean. That fault being much greater than the one that everyone is so aware of in the area of California. That fault is under the ocean, of course. And as it opens which it has been doing gradually for sometime now, it is forcing greater pressure upon what is known as the Bimini wall, which is rising to the surface of the ocean.

You will see in the next few years, not drastic, immediate, over night happenings, but rather a gradual change that will be taking place not only in the coast lines in the various areas of your country, but also in the climactic conditions and weather. There has already been, very

well I would have to say, disturbed by man, through his use of the various mechanisms of blasts, such as that, which have disturbed the very atmosphere in which you exist.

There is also a shifting on the axis that is taking place at this time. The combination of all of these is bringing about earth changes in the form of earthquakes more prevalent now than has ever been, in the forms of tidal waves, great flooding, and such as that.

The beginning period determination of your continental United States, as such, will primarily begin in the area of Florida, with the rising of the Bimini wall which is being caused by the opening of the Caribbean fault. There will be great tidal waves created, that will in fact cover the majority of what you know as Florida. It will happen in a gradual manner and the people there will have great opportunity of knowledge and warning to remove themselves from the area prior to drastic devastation.

Of course, not unlike the time of Noah will be those who will not listen, so there will be many losses that will take place. But a segment nearly in the center of the state of Florida will resurface and be as an island. I would say approximately one fourth of the total land that is there now. As it moves northward up the eastern coast it will encompass very narrow segments of approximately fifty to one hundred miles inland of each of the coastal states until such time as it reaches what you know to be the area of Delaware, Rhode Island, Massachusetts, continuing on up taking a portion of New York. Just the edge, as it were, obliterating literally, Maine, New Hampshire, Vermont. Massachusetts, Rhode Island and Connecticut will not be there as well as Delaware. That will take place prior to the drastic changes on the western coast. Also great segments, the bigger portions of Mexico will be inundated. And you will find that the California where all the great concern now in your country lies, will over this gradual period have about fifty percent of the western portion of that state will be removed. If you were to take a ruler and draw a line following the curve of the state approximately in the center, that is what will be left. On north, taking in a portion of course, of Oregon, Washington. I've tried here to give you a mental picture of a map, as it were, that will be affected most heavily.

As I said a great portion of Mexico will no longer be. You will find that the water will also include the area which you now here in the states know as being Nogales. But that will be where it will stop. So you see you're in a good place. I'm not saying that this is all going to take place within the next few years but by the year that you know as being 2000 which is approximately 20 years hence, most of this will have occurred. It will be gradual and for the most part man will have had the opportunity of being forewarned to where there would be no need for loss other than through his own lack of acceptance of understanding of what the scientific community puts forth.

There are other areas of the world that will be affected as heavily. That place which you now know as being Japan will be no more. And I could go on as it were around the various areas of the globe, however I find that it's best if I center the attention up on this area in which all of you have greater familiarity and greater concern.

Now there are those who have spoken upon this subject previously and I know most of you are familiar with Edgar Cayce, as it were, and they have very carefully selected the place in which to build the foundation for their organization based on the knowledge of these earth changes. As well as, the one you know to be the president of your country I may tell you something here you're not familiar with. His sister is a tremendous spiritual healer and is at

this very time building a spiritual healing center in the area that I believe you call Tennessee. Again, with that area being very carefully selected on the basis of the knowledge, of advanced knowledge, of that which will take place in the earth changes within the next 20 years within your country here.

There will be eruptions of volcanoes, there will be many disturbances, and we in spirit see great portions of this being done, not only through devastation by water, but also that of fire. Now the common denominator is to stop and consider, fire and water don't mix too well. Well they didn't when I was in the body at least. But however man has created such storages of electricity that will be shorted into the rising waters that it will in fact bring forth great fires, explosions and electrocutions. I'm not saying any of this, as I said in the onset, to cause fear, I'm only putting it forth for the purpose of your own awareness and enlightenment. Now I'm not telling you something which hasn't been told to the majority of those living in these very areas which I have spoken about this evening.

But man has great difficulty in his conscious awareness of accepting anything which is contrary to his own desires. That is the same exact situation that those who perished, as it were, in Atlantis, took. Their interest was that primarily of things of the material and of self. They were a very highly spiritually advanced culture, and created their own devastation, as it were, out of greed and self importance rather than love for their fellow man. It is being done again now by all the major countries of your world. And it is in total harmony with and in tune with the laws of God, or laws of nature if you prefer, the laws of cause and effect. And if the cause that is put forth is that of negative which it has been, to the atmospheric condition as well as the land and all other areas, then the effect which has to be reaped must be that according, and it shall be.

So when you find those who are saying, we need to build greater atomic plants as it were, nuclear plants as you know them to be, gearing up for greater war efforts with more bombs, to reap greater devastation not to upon just man, but upon the very atmosphere in which man lives and has his being. Then it would behoove each of you to stand forth in opposition, opposing verbally and in whatever reasonable manner possible, the going forward with that concept of thought. Now I told you a couple of weeks ago I don't want any of you to run out and immediately invest in as it were, a boat yard or don't buy docks or things of that nature because Tucson will not be a seaport. I'm trying to put back a little levity into this group, before I get down into the bottom of the ocean as it were.

As I said, I did not come forth this evening for the purpose of creating fear, but really that of awareness of what has been and is still taking place in your world. It will have and you can watch it as the times progress, by the year you know to be 1982, you will have already witnessed many significant changes. Not only in your country but in the various countries of the world. That's why when I gave the annual prophecies that there was a great deal that had to be spoken of, of devastation and that of the negative influence. Because the weather and all other things that are being changed radically by man. Not by God, but by man.

So it is with that thought in mind that I hope that I have given you this evening, a little hedge as it were, on the inside information, as to the earth changes that you can expect, that within the next decade here in your world.

Now I believe by this time I should've already caused enough concern and thought for a great number of questions. So at this time I'll address those questions pertaining to the subject.

Question: Will with the shrinking of the landmass, will people's attitudes in general change as far as their neighbor?

Dr. Blair: By all means. As it says in the good book that all shall bend their knee and it will certainly bring them more in line and in tune with their need for spiritual awareness and living in harmony and love, and peace with their fellow man. Yes. By all means.

Formatted: Font: Times New Roman, 14 pt

Question: Can you give us any time on the Japan...You said Japan would disappear. Can you give us any idea?

Dr. Blair: That I'll...we see this coming about nearly at the end of the century.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Question: Will Long Island go on then?

Dr. Blair: They say long what? That's what they'll be saying about it.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Question: Will we be expecting a change in our climatic...in our climate here in this area?

Dr. Blair: Yes, by all means, but you'll still have by far better conditions than any other major area throughout your country.

Formatted: Font: 14 pt

Question: Will we go from a desert area into another kind of zone?

Dr. Blair: You will see more growth, as it were. I'm speaking now of earth life and plants and such as that. There will be more rainfall. There will be a tempering of the temperatures, and in the extremes. There'll be greater extremes in both times, what you know being as winter, cold, as it were, and summer heat. Yes they have it pretty well messed up right now. And you're going to find even great flooding within the areas, within the confines of the very rivers within your country also. The one you call the Mississippi, that will certainly be having great floodings.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Question: I thought that Edgar Cayce said something about the great lakes emptying down that whatever was in it's path.

Dr. Blair: Well it won't empty in total, there will be a great force of water that will come from that area and also when the fault of the Caribbean erupts, as it were, in it's final eruption stage and the Bimini wall is forced upward it will create a tidal wave for a short period of time. That river that I have spoken of will actually flow to the north rather than south.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Question: So that's going to sort of change our _____ too.

Dr. Blair: That is part of the shift, yes.

Formatted: Font: 14 pt

Question: So are we going to experience the shift-we're gonna get all shaken up.

Dr. Blair: There will be minor tremors and various things of that nature which will be experienced in this area, yes. But there'll be also great...your government will try to pass off as being sonic explosions as it were, in the Gulf of Mexico. But it won't certainly be that at all. They'll say the air force is doing something there.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Question: Does that mean we'll be able to go swimming in Nogales?

Formatted: Font: 14 pt

Dr. Blair: Well that's about the size of it.

Formatted: Font: 14 pt

Question: What about the city of Chicago?

Dr. Blair: There'll be some devastation in the areas of the seaports as you know them along that part called the Great Lakes. But it'll be minor by comparison. I would say a few blocks as it were, in land will be affected. Yes, but not to any great extent.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Question: Gary

Dr. Blair: I don't know who he is. I'm teasing you of course. Yes, Gary, Indiana. I don't feel they'll be much noticed there.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Question: What about the area of Texas?

Dr. Blair: Well just stay north of Dallas. You know what they now call the panhandle. Well you'd better be in the pan or the handle one cause there isn't going to be anything below it. Yes.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Question: Will there be an upheaval _____?

Dr. Blair: I'm sorry I couldn't hear what you asked.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Question: Will there be an upheaval and cleansing in the government?

Dr. Blair: Well it depends upon which government you're speaking of. The local one here, yes there's going to be some of that. Also, by the way, first of all I must stop right here and welcome Rose because she's never had this opportunity before but I've spoken with her indirectly through the medium several times, and I'd just thought I'd give you the inside track there honey, that you're going to find some little mini sort of Watergate, as it were, within the city government, but you'll be alright so don't worry about that.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Now as to the federal government I'm sure is what you were addressing there with your question. Yes there'll be a little of that. But I've spoken on that previously so I won't take that time this evening.

Question: What would the climate of southern Arizona be equivalent to now, after all of this happens?

Dr. Blair: Compared to what it is at this time is what you're speaking?

Formatted: Font: 14 pt

Response: Right

Dr. Blair: Well one moment let me find out. I've never lived in your country so I'm not too familiar with it in that respect. But I'll check it out. They say it'll be milder and more humid than what it was previously, all right, nearer to that of the area you know as being Hawaii. Well, I've told you all along that you certainly are living in the right place.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Question: Well what will happen to Hawaii?

Dr. Blair: Well there'll be some remnants left, yes, but only the higher peaks.

Formatted: Font: 14 pt

Question: Will this thin out the world population a little.

Dr. Blair: Well some of course but not too....

Question: Well some say forty or fifty percent will disappear.

Dr. Blair: That's correct-not of the entire world, no. Not at all. But there'll be areas where the population of that given area will be devastated to the extent of forty to fifty percent. Yes.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Question: What will Alaska be like?

Dr. Blair: Alaska is quite safe, as it were, and so is Canada.

Question: What about nuclear plants, what will happen to them?

Dr. Blair: By that time, hopefully, your government will have seen fit to come to their senses and have made the very necessary changes in order to not have that be a great concern.

Question: It's still a concern in certain areas?

Dr. Blair: Yes that is true that cannot be. Well let me say this, if the masses of the people living in what you know as your country had a full awareness of all of that which has been buried beneath the grounds throughout your country, as far as contaminating agents, you would all live in fear constantly. So we won't even get involved with it will we.

Formatted: Font: 14 pt

Question: Pakistan and Russia situation?

Dr. Blair: Well, yes and I have spoken on it earlier. But it's going to not be resolved immediately and you're going to see it be very threatening, as it were, and cause great concern throughout the entire world before it is finally resolved. And as I told you David, gold has done exactly as I told you it would, has it not? And silver has also and I'm not going to give you the hedge on it. But I wouldn't but a lot of silver or gold, either one, right now.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Question: You'll be in on the surge?

Dr. Blair: I said I wouldn't buy a lot right now.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Question: A lot of it is that the land will sink under water, will there be a major land arising?

Dr. Blair: There will be many small what you would call islands that will appear, yes. But it'll be along the coastal lines, and primarily, and I'm speaking around about the confines of your country. They'll be off what you know to be New York. There'll be a chain of islands as it were, that'll be there. And there will be some of that by all means.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Question: If the Mississippi is going to flood how will Iowa fare?

Dr. Blair: I'm not certain there. I believe you said Iowa. Well you see what I'm having to do is check here with others who are more familiar with the terrain than I am. I feel like it won't be of great devastation. I don't feel that any of the areas along that river will have lasting devastation as it were, but there will be tremendous flooding. Well all right, they say that they are already used to that, anyway.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Question: How will the seafood supply do?

Dr. Blair: I don't understand the question?

Formatted: Font: 14 pt

Question: How will the seafood supply change? Will there be great shortage of it?

Dr. Blair: Well yes, certainly there'll be some shortages there. Because there will be many that'll...much seafood will be devastated in the process.

Formatted: Font: 14 pt

Question: What about other foods-that are grown?

Dr. Blair: I don't see man as having a great deal of problem in this country with that. It will be a problem in other countries to a great extent, yes.

Formatted: Font: 14 pt

Question: What about China and India? Are those countries going to remain or will there be big changes there as far as landmass?

Dr. Blair: There will be considerable changes but not to the extent of course of Japan or some of the others. But there will yes, be some definite changes and obviously it won't be possible for me this evening to speak of the entire world as it were. But yes there will be changes. Almost all of the coastal areas of the world will have some changes.

Formatted: Font: 14 pt

Question: How far will the water come up to the Bisbee/Douglas area if at all?

Dr. Blair: That'll be good property to have.

Formatted: Font: 14 pt

Question: Will Manhattan, New York City be totally destroyed? Also Long Island?

Dr. Blair: Well Long Island as I said, there's a long what? Yes, I believe that the bigger portion of what you know as being New York City by all means will be devastated, yes. But they will have time. There will be plenty of warning for the people to remove themselves. But there will be those who out of their own selfishness that will refuse to believe it and they'll be devastated. Yes.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Question: I'm curious what the other governments of the world will do as this is all going on. We're known for helping everyone else out. Will there be other countries coming to our aid?

Dr. Blair: Well it won't be necessary in reality for any great amount of aid because the bigger by far, the greater portion, I would say approximately only four percent of the entire land mass of your country is going to be affected that directly. So it won't be of a great magnitude in that respect. But I'll assure you of one thing-it'll certainly take the concentration off of the...all right the fighting and bickering between the various countries of the world. And they'll certainly get their attention on themselves in a hurry.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Question: I thought they were looking into here in Tucson, because there was like crack starting on the west side and they said if there was any like, uh, tremendous change then it would sort of start surfacing. It's very small right now.

Formatted: Font: 14 pt

Dr. Blair: Well there are some, as there is throughout the entire continental United States. There are many what they would call minor faults, as it were, yes. But they're not of great magnitude, not at all. No danger there.

Formatted: Font: 14 pt

Question: With all the inundation where will they be moving the capitol too?

Dr. Blair: Well they'll have the foresight in time to pick a location, and at this time your government is not yet convinced enough to have even considered it. So when they finally get around to it, I'll let you know.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Question: _____

Dr. Blair: Well I wouldn't think you'd want that wished upon you there. It would not at all be conducive, as far as spirit is concerned, to bring that vibration here.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

There's another question there.

Response: Thank you.

Dr. Blair: You're welcome and it is all right, I enjoyed it very much more than you did. I make her a visit as it were, on Sunday, both in speaking with her and allowing her to see my presence and I found it quite enjoyable.

Formatted: Font: 14 pt

Response: Thank you for the concern too.

Dr. Blair: Well certainly, by all means. And David quit being so worried. Did you understand what I just said?

Response: Uh yeah. Thank you.

Dr. Blair: All right, you thought I was going to talk about earthquakes and all those things all night and not take care of the little ones, didn't you?

Formatted: Font: 14 pt

Question: I wanted to go back a little bit, since we're talking about all these things. Do you remember just a few months ago when this lady prophesied about Niagara Falls cracking up?

Formatted: Font: 14 pt

Dr. Blair: I'm not aware of it no.

Formatted: Font: 14 pt

Question: Well anyway I was wondering if it was really gonna come to pass. If you could give a timing.

Dr. Blair: That will be certainly a probability yes. It certainly will.

Question: No one believes her because it didn't happen.

Formatted: Font: 14 pt

Dr. Blair: Well that's all right, the majority of people don't believe that spooks can talk to you either. But here I am doing it. As Robert says that's why he gets called a kook so much.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

How are we doing on time there David, the Rock's getting a little nervous.

Formatted: Font: 14 pt

You've got four minutes.

Formatted: Font: 14 pt

Well that's what he said, he can't tell time but he know that the hands getting where it shouldn't be.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

I believe that I will not keep the body any longer, but I hope that here this evening I haven't created fear because that certainly was not my intent. My intent in bringing this is for enlightenment of you own awareness as to what to anticipate within the future, if man proceeds in the manner throughout the world that he is at this time continuing on course with, and should it be then, of course. We in spirit are greatly concerned and it would not at all be fair of me or truthful for me to say we have no concern. Because we are certainly greatly concerned and hopefully, that man in his own feeble understanding will start reversing the processes of all of

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt

the havoc, as it were, that he has already created within the very atmosphere in which you live. It has indeed once again been my pleasure to have this opportunity, as it always is.

I want to welcome all of you back who've been here before and also especially to welcome those who've not had this opportunity previous to now. And as I go to leave, I ask only that God pour forth his richest of all blessings upon each and every one of you. May you ever walk in his light and know his love. But most of all may you be filled with his Peace. God Bless you all.

Formatted: Font: 14 pt

Formatted: Font: 14 pt

Formatted: Font: 14 pt
